

Public water in Spokane Valley is provided by water districts or irrigation districts. These entities are not related to the City.

Any statement by the City of Spokane Valley relating to water concurrency will be based exclusively on information provided by the water purveyor for a given area as the owner/operator of the water facility. Spokane Valley has not performed any independent analysis as to the existence or non-existence of water capacity, and specifically makes no representations as to the accuracy of the water capacity information provided by any water purveyor. Therefore, applicants for development approvals should carefully consider the adequacy of water availability at an early stage of planning developments in the City of Spokane Valley.
