

Attention: Director of
Community Development

This letter is concerning the
late Painted Hills Golf Course!

I have often heard that Developers
get their own way no matter what the
circumstances.

Living here at "The Greens" for 20 years
I have seen the road closed due to heavy
springs run off. The development just
couple blocks south is having problems.
At a meeting I attended we were told
they are having to buy sump pumps.
It is a flood plain but not as
heavily watered as the old golf course.

This sort of thing is happening many
places. I know of one in Battle Ground WA
Also please consider the case of "Philippe
versus King County"!

Can Chester Creek be covered with
tons of dirt? Ruin the environment
and later on the environment will
ruin the homes!

Sincerely,

Jeanne Mollack-Whiting
