Hello there,

In response to the proposed Painted Hills Development on the old golf course: I strongly object to the development and its plans, including the change in proposal to infill to raise the site out of the flood plain. The affects on the flood plain, the natural environment (including animals), traffic, schools, etc are far too much to ignore or mitigate when attempting to plan over 500 residences in that area! We just went through a round of changing borders for elementary schools and are in the process of that for the middle schools, and this development would GREATLY impact the ability of our schools to continue without becoming over-full again, but after the fact. Please consider denying this proposal in order to keep south Spokane Valley the quiet, natural, beautiful area that we all love. Thanks for your time.

Cheers,

Christina & Eric Linterman
