We are Galen & Alexandra Pavliska, address 11321 E. Sundown Dr. Our lot is one of six that was taken out of a flood plain. The soil that Diamond Rock used was the bottom soil next to the Chester Creek. We do not have any drainage. If it rains or snow a inch it takes days to dry up.

Chester creek will have to drain somewhere. The smaller we make the banks the more water that is displaced.

Moving soil into the area that Diamond Rock and Black Development both has a major impact on our communities, roads, school, police and fire department, highway all will be affected negatively. In our daily lives we see natural disasters why create our own. Is Spokane Valley going to be responsible.

Galen and Alexandra Pavliska
