**RE: Pines Road and Barker Road/BNSF Grade Separation Projects for the 2016 USDOT Grant Application**

Honorable Mayor and Councilmembers:

I am writing to express my support of the 2016 FASTLANE grant application for the Pines Road and the Barker Road/BNSF Grade Separation projects. As the Mayor of the City of Liberty Lake, in the Spokane region, I am keenly aware of the potential detrimental effects of these at-grade crossings, especially given the proposed growth in train traffic through Spokane from increased oil and coal shipments to the west coast. Pines Road, Barker Road and the BNSF tracks provide a vital transportation link to the businesses and residents along the BNSF tracks and I-90.

These projects would significantly improve a key link to I-90 and the BNSF railroad for expanded freight use, and are crucial to jobs and economic development for our region. Because of the current status of existing intersections, many freight trips are forced to access I-90 via a circuitous route, experiencing congestion due to inadequate capacity for vehicles accessing the Barker Road and the Pines Road/I-90 interchanges. Additionally, Pines Road and Barker Road serve as a secondary access to a major commercial and industrial area in Spokane County; these intersections are frequently over capacity.

The high train volumes intersecting Pines Road and Barker Road at the at-grade crossings are an increasing safety risk. Removing the at-grade rail crossings will improve public safety by reducing the potential for rail/vehicle collisions and improve emergency access to residents and businesses.

Both proposed grade separation projects will help improve the efficiency of the rail movements along the corridor and address environmental, noise, safety, and congestion issues impacting the City's street network.

Our community provides 6000 jobs, most of which are well-paying technical jobs and is dependent on employees gaining access to I-90 in order to get to work, as well as the many jobs

available to our constituents located in the Spokane Valley Industrial Park. Improved access will affect the economy in our city by providing jobs and opportunities to our neighboring residents and allowing our residents opportunities available just outside the boundaries of Liberty Lake.

We believe strongly in the future of Spokane Valley as a regional center for manufacturing. A new overpass at these intersections will be an important transportation facility for the city of Spokane Valley, Spokane County, and the Spokane region. In order to help our business and our community thrive, we urge you to provide funding crucial to the construction of the Pines Road and Barker Road/BNSF Grade Separation projects.

Sincerely,

A handwritten signature in black ink that reads "Steve Peterson". The signature is written in a cursive, flowing style.

Steve Peterson, Mayor  
City of Liberty Lake
